General Provisions

All Utilities must be installed under any culverts they cross.

During the process of the work, such barricades, lights and other traffic control devices shall be erected and maintained as may be necessary or as may be directed for the protection of the traveling public. Said barricades, lights and other traffic control devices shall conform to the current issue of the Manual on Uniform Traffic Control Devices. Parked equipment and stored materials shall be as far from the travel way as feasible. Items left overnight within 30 feet of travel way shall be marked and/or protected. The BCH may provide barricades (when available) upon request.

In accepting this permit, the permittee, its successors and assigns, agrees to hold the BCH harmless from any and all liability on account of the erection, installation, construction, maintenance or operation of the facilities located under this permit.

Any disturbance of the traveled surface of the road and/or traffic control devices, shall be restored to the satisfaction of the BCH. Permittee shall be responsible for proper pavement cut, excavation, backfill, compaction and asphalt repair. Asphalt repair shall be in accordance with Exhibit 3 –Figure C, 1, – Manual for Use of Right of Way – Permits for Utilities and Encroachments.

If the work done under this permit interferes in any way with the drainage of the highway, the permittee shall wholly and at his own expense make such provision as the BCH may direct to take care of said drainage.

On completion of said work herein contemplated, all rubbish and debris shall be immediately removed and the roadway and road side shall be left neat and presentable to the satisfaction of the BCH.

All of the work herein contemplated shall be done to conform to current government and industry standards under the review and to the satisfaction of the BCH and the entire expense of said review shall be done by the permittee.

The BCH hereby reserves the right to order the change of location or the removal of any structure(s) or facility (ices) authorized by this permit. Said change or removal to be made at the sole expense of the permittee, or its successors and assigns.

All such changes, reconstruction or relocation by the permittee shall be done in such a manner as will cause the least interference with any of the BCH work.

This permit shall not be deemed or held to be an exclusive one and shall not prohibit the BCH from granting other permits or franchise rights or like or other nature to other public or private utilities, nor shall it prevent the BCH from using any of its public rights-of-way, or public places, or affect its right to full supervision and control over all or any part of them, none of which is hereby surrendered.

The BCH may revoke, amend, amplify, or terminate this permit or any of the conditions herein enumerated if permittee fails to comply with any or all of its provisions, requirements or regulations as herein set forth or through willful or unreasonable neglect, fails to heed or comply with notices given, or if the utility herein granted is not installed or operated and maintained in conformity.

The permittee shall maintain as its sole expense the structure or subject for which this permit is granted.

Adequate drawings or sketches shall be included showing the existing and/or proposed location of the facility with respect to the existing and/or planned location of the highway improvement, the traveled way, the public right-of-way lines and approved access points.

If trench or pavements settlement should occur within two years from the date of installation, repairs shall be made by the permittee as directed by the BCH at no cost to the BCH. If the permittee fails to make the necessary repairs the BCH will make the repairs and bill the permittee. No new permits shall be issued to the permittee until such claim has been settled.

No work shall be started until an authorized representative of the BCH has given notice to the permittee to proceed. Permittee shall notify the BCH to schedule a time for road closure and opening – if the work will prevent emergency traffic from traveling through, local law enforcement office must be notified.

A bond in the amount of \$ _____ is required for the protection of the BCH as set forth in the terms of the bond. Any replacement of, addition to, or change in the facility granted by this permit shall require a new permit prior to initiation of such work.
